

VIGNESHWARAN

Java Backend Developer | Full Stack Developer

📍 Coimbatore, Tamil Nadu, India | 📞 +91 90423 71673 | ✉️ vigneshwarachakravarthy@gmail.com | 💻 LeetCode

Professional Summary

Results-driven Java Backend Developer with hands-on experience building scalable REST APIs and full-stack web applications using **Spring Boot**, **React.js**, **Node.js**, and **PostgreSQL**. Proficient in designing robust backend architectures, implementing JWT-based authentication, and managing relational databases with optimized schema design. Demonstrated ability to deliver end-to-end solutions — from backend API development to responsive frontend interfaces — with a strong foundation in OOP, Data Structures, and System Design. Passionate about solving real-world problems through clean, maintainable code and eager to contribute to high-impact engineering teams.

Technical Skills

Languages: Java, JavaScript, SQL, C

Backend: Spring Boot, Node.js, REST APIs, JWT Authentication

Frontend: React.js, HTML5, CSS3, Bootstrap

Database: PostgreSQL, pgAdmin

Tools & IDEs: Git, GitHub, Docker, Postman, IntelliJ IDEA, VS Code

Core Concepts: OOP, System Design, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Education

Bachelor of Technology – Computer Science and Business Systems

Expected: May 2027

Dr. N.G.P. Institute of Technology, Coimbatore, Tamil Nadu

CGPA: **7.89 / 10.0**

Internship

Java Backend Intern at Technology Firm

2024

Java | Spring Boot | PostgreSQL | REST APIs | Git

- Developed and maintained RESTful APIs using **Spring Boot**, enabling seamless communication between frontend and backend services and improving API response time by optimizing endpoint logic.
- Designed and managed **PostgreSQL** database schemas, wrote optimized SQL queries, and applied indexing strategies to improve data retrieval performance.
- Implemented **JWT-based authentication** and role-based access control to secure API endpoints, enhancing application security compliance.
- Diagnosed and resolved backend bugs through systematic debugging, contributing to improved system stability and reduced production issues.
- Collaborated in an **Agile/Scrum** environment using **Git** for version control, participating in code reviews and sprint planning sessions.

Projects

SkillScope – AI Skill Gap Analysis Platform

Java · Spring Boot · React.js · PostgreSQL

- Built a full-stack AI-powered platform that analyzes uploaded resumes and identifies skill gaps against target job roles, delivering personalized learning roadmaps to users.
- Engineered RESTful backend APIs with **Spring Boot** to process resume data, integrate AI recommendation logic, and persist structured results in **PostgreSQL**.
- Developed an interactive **React.js** dashboard displaying skill gap reports, progress tracking, and curated course recommendations with dynamic filtering.
- Implemented **JWT authentication** for secure user sessions and role-based access, ensuring data privacy across multi-user workflows.

ERP Management System

React.js · Node.js · Express.js · PostgreSQL

- Designed and developed a comprehensive Enterprise Resource Planning system with modules for **employee management, attendance tracking, and automated payroll processing**.
- Built a **Node.js** backend with RESTful APIs handling CRUD operations for HR records and payroll calculations, integrated with **PostgreSQL** for reliable data persistence.
- Created an admin dashboard in **React.js** with role-based authentication, enabling HR managers to manage workforce data and generate payroll reports efficiently.

City Connector – Civic Issue Reporting Platform

React.js · Node.js · PostgreSQL

- Developed a civic engagement platform allowing citizens to **report and track local infrastructure issues** with location-based tagging, streamlining government response workflows.
- Implemented a real-time complaint tracking system with status updates (Pending → In Progress → Resolved), improving transparency between citizens and administrators.
- Built an **admin dashboard** in React.js for municipal staff to manage, prioritize, and close reported complaints with filtering by location, category, and urgency.

Doctor Appointment Booking System

React.js · Node.js · PostgreSQL

- Engineered a healthcare scheduling platform with **Spring Boot** REST APIs for appointment booking, doctor availability management, and patient record storage.
- Designed normalized **PostgreSQL** schemas for doctors, patients, and appointments with referential integrity constraints, enabling efficient query performance.
- Integrated **JWT-secured authentication** with distinct patient and doctor roles, providing a tailored React.js frontend experience for each user type.

Lost Item Finder Portal

Java · Spring Boot · React.js · PostgreSQL

- Built a community-driven lost-and-found portal with **Spring Boot** APIs supporting item reporting, keyword-based search, and claim management workflows.
- Implemented a secure claim verification system allowing registered users to submit, review, and approve item claims with audit trails stored in **PostgreSQL**.

JavaFX Web Browser

Java · JavaFX

- Developed a **desktop web browser** application using JavaFX with an embedded WebView engine, supporting full navigation (forward, back, refresh, URL bar) and a modern UI layout.
- Applied **JavaFX Scene Builder** patterns and CSS styling to deliver a responsive, intuitive user interface resembling commercial browser experiences.

Achievements

Hackathons & Competitions

- **IBM Hackathon Finalist** – Selected among top teams for innovative technical solution at IBM’s national-level hackathon.
- **Odoo Hackathon Finalist** – Reached finals in Odoo’s competitive ERP-focused hackathon, demonstrating full-stack development skills.
- **IISF-2024 Science & Technology Hackathon Finalist** – Recognized at the India International Science Festival 2024 for a technology-driven project.
- Winner of multiple **intra-college technical competitions** including coding challenges and project exhibitions.

Certifications

- NPTEL – *Introduction to Internet of Things*
- NPTEL – *Cloud Computing*
